

David Dangerfield

Principal Software Engineer

Consumer Products | Health | Payments | CleanTech | Enterprise Software | 20+ Years

Minneapolis, Minnesota | [linkedin.com/in/dangerfield](https://www.linkedin.com/in/dangerfield)

SUMMARY

Principal Software Engineer with a passion for the craft of coding, testing, shipping, and supporting software across the full stack to delight clients. Combines formal education (MS in CS, Purdue), decades of deep-system experience, and modern agentic AI to deliver rapid solutions, critically analyzed to ensure quality. Experience includes high-stakes software such as payments, FDA-regulated healthcare platforms, user-counts in the millions, and commerce sites that bring in billions. A hands-on individual contributor who enjoys modernizing legacy systems, removing technical debt, performing large upgrades across multiple repos, delivering clean code and modern user experiences, and automating testing and deployment. A collaborative engineer who builds one on one rapport with teammates to learn from them, share ideas, and foster team trust.

TECHNICAL PROFILE

Languages: TypeScript, JavaScript, Java, Kotlin, Python

Backend & Frameworks: REST APIs, Spring Boot, Node.js, Message Queues, Microservices, I18n, Legacy Modernization

State Mgmt & Data Stores: TanStack, Vuex/Pinia, Redux, MySQL, MongoDB, Elasticsearch, PostgreSQL, Redis

Cloud & Infrastructure: AWS, Azure DevOps, GitHub Actions, Docker, Google Cloud Platform, Kubernetes

AI & Testing Tools: Copilot, Claude, Playwright, Cypress, Jest, JUnit

Frontend: Vue.js, React, Next.js, GraphQL, Angular, Design Systems, Accessibility, Component Libraries, Tailwind, ECharts

EXPERIENCE

Principal Software Engineer (Contractor)

Mar 2025 - Aug 2026

Patterson Companies (Remote)

- Rewrote the rigid legacy Angular.js bill pay frontend of dental and veterinary sales sites in responsive Vue.js, supporting a multi-billion dollar revenue stream with locale-aware code
- Translated Figma designs to TypeScript and Vue.js frontend extending the UI component library for consistency and integrating with .NET backend hosted in Azure and C# microservices to SAP
- Transitioned to agentic development using GitHub Copilot and Claude

Tech: Copilot, Claude, Node.js, TypeScript, Vue.js, Microfrontends, Microservices, SQL Server, Azure DevOps, I18n

Lead Software Developer (Contractor)

Jul 2022 - Mar 2025

Life Time (Remote)

- Built web and app experiences for a major consumer fitness platform, driving hundreds of thousands of new accounts and app installs
- Replaced legacy libraries in core platform code to modernize and remove tech debt

Tech: GitHub Copilot, TypeScript, Vue.js, Bootstrap, Vite, Vitest, Playwright, Legacy Modernization, App Integration

Senior Software Engineer (Concurrent Part-Time Contractor)

Feb 2018 - Mar 2024

Nurocor (Remote)

- Developed UI for a structured authoring platform for FDA clinical trial documentation, enabling compliant document templates, formal review workflows, and complete audit trails on every edit
- Contributed frontend expertise to a system recognized by the TransCelerate BioPharma ClinEco Protocol Review Challenge as “Best Integrated Protocol Authoring and Review Solution”

Tech: Kubernetes, HIPAA, Vue.js, Nuxt.js, Storybook, GraphQL, Component Libraries

Principal Software Engineer Consultant (Contractor)

Jan 2021 - Jul 2022

NextEra Analytics (Remote)

- Developed web application UI features to replace manual spreadsheet workflows for high-scale renewable energy project optimization
- Built interactive executive dashboards and data visualizations using ECharts to make complex capital allocation and energy asset metrics easily actionable

Tech: TypeScript, Vue.js, GraphQL, ECharts, Angular, Storybook, Python, Terraform, AWS

Senior Software Consultant (Concurrent Part-Time Contractor) *Sep 2020 - Feb 2022*

Intricately (Acq. by HG Insights) (Remote)

- Brought on by the CTO to audit the codebase, deliver technical recommendations, and suggest engineering practice adjustments across an international team
- Provided implementation guidance to ensure a smooth Vue 2 to Vue 3 migration path while reducing codebase complexity and avoiding over-engineering
- Collaborated closely with remote developers to build trust, mentor, and provide leadership

Tech: TypeScript, Vue.js, Node.js

Senior Software Engineer

Sep 2018 - Jan 2021

SmugMug (Remote)

- Migrated legacy frontend payment code to Stripe to modernize transaction processing
- Drove subscriber growth through A/B testing experiments in close collaboration with product and UX teams
- Contributed to onboarding experience improvements, reducing friction for new customers

Tech: AWS, Node.js, JavaScript, React, Tailwind, GraphQL, Continuous Deployment, Legacy Modernization, A11y

Advisory Software Engineer, Watson Health, & IBM Services

Nov 2015 - Aug 2018

IBM (Rochester, MN)

- Developed early AI-powered pharmaceutical research experiences using IBM Watson NLP to surface relationships across biomedical literature
- Built clinical decision support applications for healthcare workers including diabetes treatment recommendations and patient history visualization, under HIPAA compliance protocols
- Delivered cognitive AI applications for financial clients including a top 50 US bank
- Co-founded FED@IBM Rochester, an internal frontend developer community of 30+ engineers hosting twice-monthly sessions on JavaScript, accessibility, UI automation testing, and tooling

Tech: IBM Bluemix (Cloud), Vue.js, Angular, React, JavaScript, I18n, D3.js, Mobile Web App, Legacy Modernization

Senior Web Application Developer

Aug 2013 - Oct 2015

Preventice Solutions (now Boston Scientific) (Rochester, MN)

- Built frontend and backend systems supporting BodyGuardian, an FDA-cleared wearable cardiac monitoring device transmitting patient data to clinical care teams
- Developed the Notification Service that delivered cardiac alerts to clinical staff, a critical component in a patient-care pipeline requiring high reliability
- Shipped within FDA and HIPAA constraints, translating strict compliance requirements into reliable software delivery

Tech: Java, C#, REST APIs, ActiveMQ, Identity Management, SAML SSO, ASP.NET, SQL Server, Angular

Software Engineer, Team Lead, Test Architect

May 2002 - Aug 2013

IBM (Rochester, MN)

- Ported IBM Directory Server (LDAP) to IBM i, a commercially shipped enterprise product
- Co-designed the test strategy and tool ecosystem for a new product line, co-leading engineering teams in Beijing to execute full product validation across multiple simultaneous releases
- Automated software update packaging, eliminating 500+ person-hours of manual effort annually and enabling self-service builds across teams

Tech: C++, Identity Management & Security, REST APIs, Java, JavaScript, Perl, IBM Db2, I18n

Software Engineering Intern

May 2001 - Aug 2001

Intel Corp. (Hillsboro, OR)

- Developed face-based search applications for the consumer photo market

Tech: Java, Image Processing Integration

EDUCATION

Master of Science in Computer Science | Purdue University, 2002

- Theory of Computation, Advanced Networking, Distributed Databases, OS Implementation, Cryptography

Bachelor of Science in Computer Science | Brigham Young University, 2000

- Research assistant to Dr. Tony Martinez developing a neural network training model for handwritten character recognition engine in C
