

David Dangerfield

Principal Frontend Engineer | Product, Platform, and Mission-Critical Systems

Consumer Products | Payments | Healthcare | Medical Devices | 20+ Years

St. Paul, Minnesota | [linkedin.com/in/dangerfield](https://www.linkedin.com/in/dangerfield) | daviddangerfield.com

SUMMARY

Principal frontend engineer with 20+ years building products and platforms at scale across consumer, payments, healthcare, and FDA-regulated software. Delivered modern web experiences and critical workflows for systems serving millions of users and supporting multi-billion-dollar revenue streams. Strong computer science foundation (MS, Purdue) and real-world experience spanning frontend, backend, test architecture, and systems engineering. Currently using AI-assisted development workflows to increase delivery velocity without sacrificing quality.

SKILLS

Frontend: TypeScript, JavaScript, Vue.js, React, Next.js, Angular, HTML, CSS, Tailwind, Bootstrap, D3.js

Frontend expertise: Performance optimization, Design Systems, Accessibility, Component libraries, Figma / design collab

Backend: Node.js, GraphQL, REST APIs, Java, C#, C++, SQL, Message Queues

Testing: Jest, Vitest, Playwright, Cypress, xUnit

Tools: Git, GitHub, Vite, Webpack, Storybook, Azure DevOps

EXPERIENCE

Principal Frontend Engineer

Mar 2025 - Present

Patterson Companies, Inc.

- Rewrote the bill pay system for dental and veterinary sales sites serving practices across North America, supporting a multi-billion dollar annual revenue stream
- Implemented polished TypeScript/Vue.js frontend based on Figma designs with a strong emphasis on trust, clarity, and accuracy in financial workflows
- Extended Patterson's proprietary UI component library, improving consistency and maintainability across properties

Tech: TypeScript, Vue.js, Node.js, Vite, Vitest, Storybook, Git, Azure DevOps

Senior Frontend Engineer (part-time)

Feb 2018 - Mar 2024

Nurocor - Digitalized Clinical Development

- Built a structured authoring platform for FDA clinical trial documentation, enabling compliant document templates, formal review workflows, and complete audit trails on every edit
- Implemented audit trail functionality ensuring full traceability, a core FDA requirement
- Platform recognized by the TransCelerate BioPharma ClinEco Protocol Review Challenge as Best Integrated Protocol Authoring and Review Solution

Tech: Vue.js, Vuetify, Storybook, GraphQL, Git

Lead Frontend Developer

Jul 2022 - Mar 2025

Life Time Inc.

- Built web and app experiences for a major consumer fitness platform, driving hundreds of thousands of new accounts and app installs
- Replaced legacy libraries in core platform code for high-traffic consumer sites

Tech: TypeScript, Vue.js, Bootstrap, Vite, Vitest, Playwright, GitHub

Principal Frontend Engineer Consultant

Jan 2021 - Jul 2022

NextEra Analytics

- Built decision-support tools helping energy sector leaders direct billions of dollars in annual capital spending, replacing manual spreadsheet workflows with scalable web applications
- Developed executive dashboards and data visualizations translating complex capital allocation data into actionable business intelligence

Tech: Vue.js, GraphQL, eCharts, Storybook, Git

Senior Frontend Consultant (part-time)

Sep 2020 - Feb 2022

Intricately (Acq. by HG Insights)

- Partnered directly with the CTO to level up frontend engineering practices across a globally distributed team
- Contributed to a B2B cloud spend intelligence platform subsequently acquired by HG Insights

Tech: TypeScript, Vue.js, Git

Senior Frontend Engineer

Sep 2018 - Jan 2021

SmugMug

- Developed and maintained SmugMug.com, one of the longest-running independent subscription-based web services, hosting billions of photos for millions of customers worldwide
- Replaced legacy custom payment processing with Stripe integration, modernizing financial infrastructure for a high-volume consumer platform

Tech: JavaScript, React, Tailwind, GraphQL, Git, Continuous Deployment

Frontend Developer, Watson Health Consulting Services

Nov 2015 - Aug 2018

IBM Services

- Developed early AI-powered pharmaceutical research experiences using IBM Watson NLP to surface relationships across biomedical literature
- Built clinical decision support applications for healthcare workers including diabetes treatment recommendations and patient history visualization, under HIPAA compliance protocols
- Delivered cognitive AI applications for financial clients including a top 50 US bank
- Co-founded FED@IBM Rochester, an internal frontend developer community of 30+ engineers hosting twice-monthly sessions on HTML, CSS, JavaScript, accessibility, UI automation testing, and developer tooling

Tech: Vue.js, Angular, JavaScript, HTML, CSS

Senior Web Application Developer

Aug 2013 - Oct 2015

Preventice Solutions (now Boston Scientific)

- Built frontend and backend systems supporting BodyGuardian, an FDA-cleared wearable cardiac monitoring device transmitting patient data to clinical care teams
- Developed the Notification Service that delivered cardiac alerts to clinical staff, a critical component in a patient-care pipeline requiring high reliability
- Shipped within FDA and HIPAA constraints, translating strict compliance requirements into reliable software delivery

Tech: JavaScript, SAML SSO, ASP.NET, C#, ActiveMQ, Java, Angular

Software Engineer / Team Lead / Test Architect

May 2002 - Aug 2013

IBM Systems

- Ported IBM Directory Server (LDAP) to IBM i, a commercially shipped enterprise product.
- Architected test infrastructure and led functional testing across international teams
- Automated software update packaging, eliminating 500+ person-hours of manual effort annually and enabling self-service builds across teams

Tech: C++, Java, JavaScript, HTML, CSS, Perl, IBM Db2

EDUCATION

Master of Science, Computer Science | Purdue University, 2002

Bachelor of Science, Computer Science | Brigham Young University, 2000
